

Tomorrow — "Information technologies for new school"

The title of the conference "Information technologies for new school" participants habitually shortened to "ITS". For the eighth year in St. Petersburg are about teachers, principals, experts in education and all curious people to discuss the problems of quality management of education and use of information and communication technologies (ICT).

instagram-BR0jPHwgwQl

The conference will discuss:

Information technologies in education quality management;
ICT as a tool of implementation of the FSES on different levels of education;
The possibility of using ICT in further education
in support of participants of educational process;
ICT in the work with gifted children and children with special needs;
ICT and opportunities for professional growth of the teacher;
* Creation of modern information educational environment;
New means of information and perspectives of their use.

Team Newtonew looking forward [programming help](#) to all ITS where we spend a lot of interesting things:

30 Mar

14:30-16:00, Library. Evgeny Smirnov "Why the school needs the media": do we Need a school media? And if you need, what? Whether any publicity is good? Whether you need school to work on public image - and why? What share of responsibility of media in the public attitude to mass school education system?

March 31,

12:00-13:30, 14:00-15:30, OpenSpace 2.1. An outdoor cinema TED. Watch videos from the TED conference, lead the discussion and collect feedback from teachers.

10:00-16:00 OpenSpace 3.2. Games "Journalism game". Check whether the teacher is to work with information so that it wanted to read.

10:00-10:40. Evgeny Smirnov "Innovations which disturb us"
